SUMMARY

AI/ML undergraduate with strong skills in machine learning, deep-learning, artificial intelligence and algorithms. I have experience transforming data into actionable insights using various programming languages and frameworks. Dedicated to developing impactful AI solutions, I possess strong team management skills to ensure successful product development.

SKILLS

- **Languages:** C, C++, R, Python, SQL, Java, MATLAB
 - **Tools:** Git, GitHub, MongoDB, Postgres, Docker, Weka, Power Bi
 - **Analysis & Research:** Data Analysis, Business Intelligence, Feasibility Studies, Performance Metrics
 - **Frameworks:** PyTorch, TensorFlow, Keras, Langchain, MLflow, Apache Spark, AWS Sagemaker, Kubernetes
 - **Leadership Skills:** Team Leadership, Time Management, Problem Solving, Critical Thinking, Effective Communication
-

EDUCATION

Heritage Institute of Technology (2023-2027)

- B.Tech in CSE (AI & ML)

Delhi Public School, Joka, South Kolkata (2021-2023)

- Central Board of Secondary Education

Vivekananda Mission School, Joka (2021)

- Indian Certificate of Secondary Education
-

PROJECT

CarbonTrack

<https://github.com/Davygupta47/co2>

- An EdTech project focused on optimizing carbon tracking in coal mines.
- Created a carbon tracking system for coal mines with AIML aiming to forecast emissions and propose actionable solutions for carbon neutrality.
- It generates the average carbon footprint of a mine, keeping all other parameters like geo-spatial location, forests, others.

DailyMate

<https://github.com/Davygupta47/PersonalAI>

- Recommended books, movies and songs on a dataset collected by web-scraping using LLM.
- Generated mood-aligned daily schedules with integrated chatbot support.
- Unified entertainment, planning, and conversation in a single user-friendly interface.
- Proper generation of music playlist based on mood-prediction modeling.

Neurexx

<https://github.com/Davygupta47/neurexx>

- A project aimed at providing accessible mental health support through technology using NLP in assessing with proper mapping to neurotransmitters.
- Designed a mental health web app featuring a chatbot therapist.
- Clinical assessments to support individuals with mental health challenges.

SalesAI - Conversational Loan System

<https://github.com/Davygupta47/salesai>

- Created a multi-agent orchestration system AI to automate the loan lifecycle, including customer inquiries and sanction letter generation.
- Developed a technical underwriting engine that uses financial formulas and three-tier risk logic for real-time pre-approval limits and credit eligibility along with an interactive sales agent for autonomous negotiation, utilizing smart strategies to communicate customers.

Pillchill - Digital Ecosystem for Healthcare

<https://github.com/Davygupta47/pillchill>

- Developed a predictive engine to analyze historical intake patterns and proactively identify high-risk scenarios using behavioral modeling.
- Integrated an OCR pipeline to automate prescription data extraction from medical packaging, achieving high accuracy in dosage and frequency recognition.
- Leveraged clustering algorithms to categorize adherence trends, transforming raw user logs into data-driven health insights for clinical reporting.

Zeta- Real-Time Communication Platform

<https://github.com/Davygupta47/zeta>

- Created a chat system with the MERN stack and Socket.io, offering low-latency messaging, delivery status tracking, and live user presence indicators.
- Built a secure authentication system using Email OTP and JWT, including a 24-hour self-destructing status feature and multimedia integration via Cloudinary.
- Enhanced data flow by managing global states for real-time reactions and using MongoDB TTL indexes for efficient content expiration.

PROFESSIONAL EXPERIENCE

Fizofy (Startup) - Technical Team Lead

October 2025 - January 2026

- Led a cross-functional team to develop and launch AI-driven health features, including personalized diet planning and real-time fitness tracking.
- Managed project timelines and coordinated team efforts to ensure the successful delivery of high-quality, HIPAA-compliant healthcare solutions.
- Mentored team members and fostered a collaborative environment, driving continuous improvement in product development and user satisfaction.

American Society of Microbiology - Global Outreach Student

August 2024 - January 2026

- Promoted microbial science to a global audience by organizing educational events and networking opportunities for students and professionals.
- Shared scientific research through workshops and outreach programs to help make complex microbiology and implement cutting AI technology for better understanding of structures.

Zidio Development - Data Research Analyst

January 2025 - April 2025

- Extracted and synthesized large datasets using Python and SQL to identify emerging market trends, providing actionable insights that informed strategic project planning.
- Developed interactive dashboards in Power BI/Tableau to visualize complex research findings, enabling stakeholders to make data-driven decisions with greater speed and accuracy.
- Streamlined data collection and cleaning workflows by implementing automated scripts, significantly reducing manual errors and improving the reliability of research outputs.
